

Accounts Payable Dashboard - Project Documentation

Project Overview

The Accounts Payable (AP) Dashboard provides a centralized view of invoice processing, vendor payments, outstanding liabilities, overdue balances, and aging analysis. The dashboard supports finance teams in monitoring payment performance and improving cash flow management.

Business Objective

Track invoices and payments, monitor outstanding liabilities, identify overdue invoices, analyze vendor exposure, and support data-driven financial decisions.

Tools & Technologies

Power BI Desktop, Power Query, DAX, Excel, Data Modeling, and Data Visualization.

Key KPIs

Total Invoice Amount: 79M; Total Paid Amount: 32M; Outstanding Amount: 47M; Overdue Amount: 43.44M; On-Time Payment Percentage: 28.5%.

Dashboard Pages

Executive Overview, Vendor Analysis, Invoice Trend Analysis, and Aging Analysis.

Business Insights

Outstanding liabilities represent a significant portion of total invoice value. Most outstanding balances are overdue, and on-time payment performance is low. Top vendors account for a large share of exposure, indicating vendor concentration risk.

Recommendations

Prioritize overdue invoices, focus on high-exposure vendors, improve approval workflows, implement payment reminders, and monitor AP KPIs regularly.

Skills Demonstrated

Data Modeling, DAX, Power Query, Financial Analytics, KPI Development, Dashboard Design, and Business Insight Generation.
